Notice to readers

The opinions expressed in articles are those of the authors and are not necessarily endorsed by the Tropical Products Institute.

Requests for permission to reprint articles from this journal should be sent to the Editor and to the author(s).

Tropical Science is distributed on behalf of the Tropical Products Institute by **Her Majesty's Stationery Office,** to whom **subscriptions** (£13.04 per annum including postage) should be sent. The address is: Her Majesty's Stationery Office, B5 Subscriptions, P.O. Box 569, London SE1 9NH. Cheques should be made payable to 'Her Majesty's Stationery Office' and crossed.

Microfilm editions of *Tropical Science*, including all volumes published hitherto (1959–78), are obtainable from University Microfilms Ltd, St. John's Road, Tyers Green, Penn, Bucks. Normal size reproductions of out-of-print issues of *Tropical Science* are available from the Johnson Reprint Company Ltd, 24/28 Oval Road, London NW1 7DX.

Tropical Science

Volume 20, 1978

Contents

ARTICLES

A review of work on insect pheromones at the Tropical Products Institute. By B.F.Nesbitt, *Tropical Products Institute, London 1*

Small-scale vinegar production from bananas. By M.R.Adams, *Tropical Products Institute, London 11*

Packaging of horticultural produce for export. By J.H.New, F.J.Proctor and V.J.Hewitt, *Tropical Products Institute, London 21*

Substitution between vegetable oils and the trade of developing countries. By J.Nusbaumer and R.Franco, *GATT Secretariat, Geneva 35*

Cultivation, extraction and processing of ramie fibre: a review. By C.G.Jarman, A.J.Canning and S.Mykoluk, *Tropical Products Institute, London 91*

Conserving grain on the small farm in the tropics. By P.S.Hindmarsh, P.S.Tyler and D.J.Webley, *Tropical Products Institute, London 117*

Development of a fish silage/carbohydrate animal feed for use in the tropics. By J.G.Disney, A.Hoffman, *Tropical Products Institute, London,* J.Olley, *Tasmanian Food Research Unit, Hobart,* I.J.Clucas, A.Barranco and B.J.Francis, *Tropical Products Institute, London 129*

Storage and market diseases of yams. By R.A.Noon, *Tropical Products Institute, London 177*

Aubergines and courgettes: the market in selected Western European countries. By P.King, *Tropical Products Institute, London 189*

Palm oil mill effluent: a review of the methods proposed for its treatment. By J.B.Davis, *Tropical Products Insitute, London 233*

On the composition of Ghanaian bambara groundnuts (*Voandzeia subterranea* (L.) Thouars). By E.V.Doku, *University of Ghana,* T.W.Hammonds and B.J.Francis, *Tropical Products Institute, London 263*

SHORT COMMUNICATIONS

Date palm fibre: a possible new use. By A.S.Al-Zubaidy, V.Bukhaeva and M.Al-Douri, *Palms and Dates Research Centre, Baghdad 59*

Dyeing of gourds. By M.Edwards, *Tropical Products Institute, London* *193*

Some components of two *Capsicum* species grown in Nigeria. By B.K.Ogunmodede, *University of Ibadan, Nigeria* *197*

CONFERENCE REPORTS

Caribbean Natural Products Meeting *271*

ITC/WPO International Consultation on Packaging *275*

International Symposium on Animal Fats in Feeds *277*

International Hide and Allied Trades Improvement Society Congress *279*

International Symposium on New Pulps for the Paper Industry *281*

IV ACORBAT Conference *283*

PUBLICATIONS BY INSTITUTE STAFF *63, 145, 201, 285*

BOOK REVIEWS *71, 157, 213, 293*

INDEXES

Subject index *307*

Author index *313*

Book reviews index *314*

Subject index

Page numbers marked with an asterisk denote book reviews

Acidity
  banana wine acetification *13, 16–18*
  fish silage/carbohydrate animal feed *132, 133, 140*
Aerobic treatment, palm oil mill effluent *249*
African armyworm, pheromones *5–7*
African bollworm, pheromones *7*
Agriculture *see also* Cultivation, Harvesting, etc.
  microbiology **87*
Airtight storage, grain *122*
Alcohol
  bananas, fermentation *15*
  beverages **226*
Amino acids
  bambara groundnuts *263–269*
  fish silage/carbohydrate animal feed *132, 134, 136*
Anaerobic treatment, palm oil mill effluent *247–252*
Angoumois grain moth, infestation of maize *120*
Arid zones **220*
Ascorbic acid, *Capsicum* *197*
Ash, *Capsicum* *198*
Aspergillus spp., yams, post-harvest decay *177–188*
Aubergines, market in W. Europe *190–191*

Bacillus subtilis, degumming ramie fibres *104*
Bacteria *see also* under specific names
  fish silage/carbohydrate animal feed *133–134*
  yams, post-harvest decay *177–188*
Balistes carolensis see Trigger fish
Bambara groundnuts, composition *263–269*
Bananas
  research (conference report) *283–284*
  small-scale vinegar production from *11–19*
Beeswax, market for **302*
Beverages, alcoholic **226*
Bins (storage) *see* Containers, for grain storage
Biogas plants **78*
Biological control, insect pests, TPI work on pheromones *1–10*
Bleaching, ramie fibre *105, 113*
Boehmeria nivea see Ramie
Botryodiplodia theobromae, yams, post-harvest decay *177–188*
Bottle gourds, dyeing *193*
Boxes, packaging of horticultural produce *26–33*
Brinjal *see* Aubergines
Busseola fusca see Maize stem borer

Canning **83*
Capsicums, components of *197–200*
Caranx spp. *see* Horse mackerel
Carbohydrates
  bambara groundnuts *263–269*
  banana fermentation, analysis *13*
  fish silage/carbohydrate as animal feed *129–144*
Caribbean, natural products (conference report) *271–275*
Cassava **72, *157, *227*
  as animal feed **168*
  cultivation, pests, diseases and processing **215*
  powder, with fish silage as animal feed *129–144*
Castor oil, characteristics, uses, substitution *35–58*
Cereals *see also* under names of individual cereals
  insect pests, pheromones *5–7*
Chickens, feeding trials with fish silage/carbohydrate feed *131–132, 137–140*
Chilling injury, yams *185*
Chilo partellus see Stalk borer
Chilo sacchariphagus, pheromones *5*
Chilo suppressalis see Rice stem borer
Chisawasawa, fish silage/carbohydrate animal feed *131, 133, 137*
Citrus
  Citrus flower moth pest, pheromones *5–6*
  science and technology **165*
Citrus flower moth, pheromones *5–6*

Cocoa, tropical warehouse moth pest, pheromones *5–6*
Coconut oil, characteristics, uses, substitition *35–58*
Cocoyams **157*
Coir, chemical analysis comp. with date palm fibre *60*
Containers, for grain storage *119, 121–123*
Corticium rolfsii, yams, post-harvest decay *181*
Costs *see also* Prices
  fish silage/carbohydrate animal feed *141*
  vegetable oils production *45*
Cotton, insect pests, pheromones *5–7*
Cottonseed oil, composition *39*
Courgettes, market in W. Europe *191–192*
Cowpea, insect damage to grains *facing 122*
Crafts **163*
Cribs (storage) *see* Containers, for grain storage
Crops **295*
  grain storage on small farms in tropics *117–128*
  tropical **225*
  tropical, botany of **80*
Cultivation, ramie *93–96, 110*
Curing, yams *184*

Date palm, fibre, use as filtration material for drainage pipes *59–61*
Decortication, ramie fibres *97–101 see also* Machinery/equipment
Degumming, ramie fibres *101–105, 111–113 see also* Machinery/equipment
Diparopsis castanea see Red bollworm
Diparopsis watersi see Sudan bollworm
Diseases *see also* Pests
  yams, storage and marketing *177–188*
Drainage, use of date palm fibre as filtration material *59–61*
Drying, grain for storage *122*
Dyeing
  gourds *193–195*
  ramie fibre *109*

Earias biplaga see Spiny bollworm
Earias insulana see Spiny bollworm
Effluent, palm oil mill *see* Wastes, palm oil mill effluent
Egg plant *see* Aubergines
Egyptian cotton leafworm, pheromones *5–7*
Elaeis guineensis see Oil palm
Enzymes, alcoholic fermentation of bananas *11–19*
Ephestia cautella see Tropical warehouse moth
Essential oils (conference report) *271–275*
Ethanol, banana fermentation, analysis *13*
Evaporation, palm oil mill effluent *240*
Exports
  horticultural produce, packaging *21–34*
  vegetable oils *43–57*
Extraction
  palm oil *236–238*
  ramie fibre *91–116*

Farms, grain storage in the tropics *117–128*
Fats (animal), in feedstuffs (conference report) *277–279*
Feasibility studies, industrial **160*
Feeds (animal) *see* Feedstuffs
Feedstuffs
  animal fats in (conference report) *277–279*
  cassava **168*
  digestibility experiments **85*
  fish silage/carbohydrate *129–144*
  palm oil mill effluent as *245*
Fermentation
  bananas *14*
  methane, bibliography **294*
Fibreboard, manufacture **297*
Fibres
  Capsicum 199
  date palm, use as filtration material for drainage pipes *59–61*
  natural **74*
  ramie, cultivation, extraction, processing *91–116*
Filtration, palm oil mill effluent *254*
Filtration material, for drainage pipes, use of date palm fibre *59–61*

Fish
and fish products (conference report) *271–275*
dictionary **297*
microbiology **87*
preservation **227*
silage/carbohydrate as animal feed *129–144*
Flotation, palm oil mill effluent *254*
Food
losses, role of packaging (conference report) *276*
microbiology **87, *219*
plants **159*
processing, engineering **84*
processing, technology **302*
science and technology **164*
sensory properties **299*
Forest products (conference report) *271--275*
Fruit, products formulary **173*
Fuel, from waste **214*
Fumigation, grain storage *123*
Fungi, yams, post-harvest decay *177–188*
Fungicides, yams *184*
Fusarium spp., yams, post-harvest decay *177–188*

Garden egg *see* Aubergines
Ghana
bambara groundnuts, composition *263–269*
fish silage/carbohydrate animal feed *129–144*
Gourds, dyeing *193–195*
Grain
storage **303*
storage on small farms in tropics *117–128*
Grasses, African armyworm pest, pheromones *5–6*
Groundnut oil, characteristics, uses, substitution *35–58*
Groundnuts, Egyptian cotton leafworm pest, pheromones *5–6*
Gypsy moth, pheromones *8*

Haplochromis spp. *see* Chisawasawa
Harvesting , ramie *95*
Heliothis armigera see African bollworm
Hendersonula toruloidea, yams, post-harvest decay *181*
Herring, fish silage/carbohydrate animal feed *131, 133–137*
Hides (conference report) *279–281*
Horse mackerel, fish silage/carbohydrate animal feed *131, 133–137*
Horticultural produce, packaging for export *21–34*
Humidity, yam storage, diseases *183, 185*

Incineration, palm oil mill effluent *238*
Industry, feasibility studies **160*
Insecticides, grain storage *124*
Insects
grain storage on small farms in tropics *117–128*
pheromones, work at TPI *1–10*
Iraq, use of date palm fibre as filtration material for drainage pipes *59–61*
Irrigation, crops, use of palm oil mill effluent *242–245*

Labelling, packaging of horticultural products *30–32*
Lagenaria vulgaris see Bottle gourds
Lauric oils *see* Coconut oil *and* Palm kernel oil
Leather, quality control **77*
Legislation, packaging of horticultural products *25*
Lethrinops spp. *see* Chisawasawa
Leucaena leucocephala, potential **76*
Linseed oil, characteristics, uses, substitution *35–58*
Lipids, bambara groundnuts *263–269*
Livestock, nutrition **170*
Lucerne, Egyptian cotton leafworm pest, pheromones *5–7*

Machinery/equipment *see also* Plant
decorticator, ramie fibre *100–101, 111, 114*
degumming machine, ramie fibre *103*
harvester, ramie *110*
ribboner, ramie fibre *113*
spinning machinery, ramie fibre *114*
weaving loom, ramie fibre *114*
Macrophomina phaseoli, yams, post-harvest decay *181*

Maize
ground, with fish silage as animal feed *129–144*
insect pests, infestation *120–121*
insect pests, pheromones *6–7*
traditional storage methods *119*
Maize stem borer, pheromones *7*
Maize weevil, infestation of maize *120*
Malawi, fish silage/carbohydrate animal feed *129–144*
Malaysia, palm oil mill effluent, standards *235*
Manioc *see* Cassava
Marketing
aubergines and courgettes in W. Europe *189–192*
beeswax **302*
yams, diseases *177–188*
Meal, bambara groundnuts *263–269*
Meat
preservation **227*
technology **166*
Medicines
plants **162*
plants (conference report) *271–275*
Methane, fermentation, bibliography **294*
Microbiology
agriculture, fisheries, food **87*
foods **219*
Microorganisms, alcoholic fermentation of bananas *11–19*
Milk, substitutes (conference report) *277*
Millet, insect damage to grains *facing 122*
Mills, treatment of palm oil mill effluent *233–262*
Moisture
bambara groundnuts *263–269*
Capsicum *199*
fish silage/carbohydrate animal feed *133–135*
Moths, pheromones, work at TPI *1–10*
Mullus barbatus see Red mullet

Nigeria
Capsicum spp., components *197–200*
yam crop, post-harvest losses *178*
Nitrogen, for ruminants **222*
Nutrition
animal fats in feedstuffs (conference report) *278*
livestock **170*
Nuts, products formulary **173*

Oil *see also* under name of plant, Castor oil, Palm oil, etc.
bambara groundnuts *263–269*
fish silage/carbohydrate animal feed *133–135, 137*
synthetic *see* Synthetic oil
vegetable, substitution between oils and trade of developing countries *35–58*
Oil palm, treatment of effluent from oil extraction *233–262*
Olive oil, composition *39*

Packaging
aubergines for W. Europe *191*
(conference report) *275–277*
courgettes for W. Europe *192*
horticultural produce for export *21–34*
materials **86*
materials, horticultural products *21–34*
yams *184*
Palm kernel oil, characteristics, uses, substitution *35–58*
Palm oil
characteristics, uses, substitution *35–58*
treatment of effluent *233–262*
Paper, pulps for (conference report) *281–283*
Particleboards, manufacture **297*
Pasteurization, banana slurry fermentation *14*
Pecans **296*
Pectinophora gossypiella see Pink bollworm
Penicillium spp., yams, post-harvest decay *177–188*
Pesticides **223*
organophosphorus **171*
Pests *see also* Diseases
biological control, pheromone work at TPI 1–10
control in root crops **170*
Pheromones, insect, work at TPI *1–10*
Pigs, feeding and nutrition **217*
Pineapples, packaging for export *27, 32–33*
Pink bollworm, pheromones *7–8*

Pits (underground), storage of shelled grain *119*
Plant *see also* Machinery/equipment
mills, paper from hardwoods (conference report) *282*
mills, treatment of palm oil effluent *233–262*
Plants
lesser-known edible **159*
medicinal **162*
useful **158*
Pollution, water, palm oil mill effluent *234, 238*
Porthetria dispar see Gypsy moth
Potatoes
Egyptian cotton leafworm pest, pheromones *5–6*
production, storage, processing **218*
Prays citri see Citrus flower moth
Preservation
food **227*
woods **82*
Prices *see also* Costs
aubergines for W. Europe *190*
courgettes for W. Europe *192*
vegetable oils and fats *43–47*
Processing *see also* under the name of the particular process
ramie fibre *105–107, 113–115*
Project appraisal **213*
Proteins
bambara groundnuts *263–269*
Capsicum 198
fish silage/carbohydrate animal feed *131–143*
nitrogen for ruminants **222*
Pulp, for paper industry (conference report) *281–283*
Pulp (fruit), bananas, small-scale production of vinegar from *12–15*

Quality
aubergines for W. Europe *191*
courgettes for W. Europe *192*
leather **77*

Ramie, fibre, cultivation, extraction, processing *91–116*
Rapeseed oil, composition *39*
Rats, rat-proofing grain stores *121*
Red bollworm, pheromones *2–7*
Red mullet, fish silage/carbohydrate animal feed *131, 133–137*
Retting, ramie fibres *104*
Rhizopus nodosus, yams, post-harvest decay *181*
Ribboning, ramie fibres *99 see also* Machinery/equipment
Rice
insect pests, pheromones *5–8*
post-harvest technology **81*
traditional storage methods *118*
Rice stem borers, pheromones *5–7*
Rice weevil, infestation of sorghum *120*
Rodents, grain storage on small farms in tropics *117–128*
Root crops *see also* under specific names
pest control **170*
Rosellinia bunodes, yams, post-harvest decay *181*
Rots, yam tubers, symptoms of diseases *181*
Ruminants, nitrogen for **222*

SCP *see* Single cell proteins
Sardinella aurita see Herring
Seeds, bambara groundnuts *263–269*
Sesamia inferns see Rice stem borer
Silage, fish *see* Fish silage
Single cell proteins, treatment of palm oil mill effluent *252*
Sitophilus oryzae see Rice weevil
Sitophilus zeamais see Maize weevil
Sitotroga cirealella see Angoumois grain moth
Softening, ramie fibres *105*
Soils, palm oil mill effluent on waste land *240–245*
Sorghum
insect pests infestation *120*
traditional storage methods *118*
Soyabean oil, comparison with other vegetable oils *39, 43–45*
Sphaerostilbe repens, yams, post-harvest decay *181*
Spices **300*
(conference report) *271–275*
Spinning, ramie fibres *105–107 see also* Machinery/equipment
Spiny bollworm, pheromones *7*
Spodoptera exempta see African armyworm
Spodoptera littoralis see Egyptian cotton leafworm

Stalk borer, pheromones *5–6*
Standards
  packaging of horticultural products *25*
  palm oil mill effluent, Malaysia *235*
Storage
  crops, TPI work on insect pests pheromones *3, 8*
  grain **303*
  grain on small farms in tropics *117–128*
  potatoes **218*
  yams, diseases *177–188*
Stripping, ramie fibres *98*
Sudan bollworm, pheromones *7*
Sugar, pink borer pest, pheromones *5–6*
Sugars, bananas, small-scale production of vinegar from *11–14*
Sunflower seed oil, comparison with other vegetable oils *39, 43–45*
Surveys, insects, use of pheromones as bait in traps *3*
Sweet potatoes **157*
Swine *see* Pigs
Synthetic oil, competing with vegetable oil *50–56*

Tariffs, vegetable oils and fats exports *48–57*
Tea **79*
  and instant tea manufacture **300*
Technology
  appropriate **71, *167*
  chemical for development **293*

Book reviews index

Abstracts on cassava (*Manihot esculenta* Crantz). Volume III. (Cassava Information Center) *227*

ALVIM, P.deT. and KOZLOWSKI, T.T. (Editors)
Ecophysiology of tropical crops *225*

ANDERSON, L.L. and TILLMAN, D.A. (Editors)
Fuels from waste *214*

Appropriate technology for employment creation in the food processing and drink industries of developing countries (International Labour Organization) *302*

ARAULLO, E.V., DEPADUA, D.B. and GRAHAM, M. (Editors)
Rice: post-harvest technology *81*

BIRCH, G.G., BRENNAN, J.G. and PARKER, K.J. (Editors)
Sensory properties of foods *299*

BRAKEL, J.van
Chemical technology for appropriate development *293*

BREKELBAUM, T., BELLOTTI, A. and LOZANO, J.C. (Editors)
Proceedings cassava protection workshop *215*

BRÜCHER, H.
Tropische Nutzpflanzen. Ursprung, Evolution und Domestikation *158*

Cassava newsletter [Journal] *227*

CLOUDSLEY-THOMPSON, J.L.
Man and the biology of arid zones *220*

COBLEY, L.S.
An introduction to the botany of tropical crops *80*

CONGDON, R.J. (Editor)
Introduction to appropriate technology: toward a simpler life-style *167*

CUNHA, T.J.
Swine feeding and nutrition *217*

DICHTER, D.
Manual on improved farm and village-level grain storage methods *303*

DOUGLAS, J.S.
Alternative foods. A world guide to lesser-known edible plants *159*

ECKAUS, R.S.
Appropriate technologies for developing countries *71*

EDEN, T.
Tea *79*

Food preservation. Series 1. Fish, meat, equipment. Volume 1. Home techniques. (Food and Agriculture Organization) *227*

FORTIN, Y. and POLIQUIN, J.
Natural durability and preservation of one hundred tropical African woods *82*

FREEMAN, C. and PYLE, L. (Compilers)
Methane generation by anaerobic fermentation. An annotated bibliography *294*
